Hongkong, July 21st, 1898.

THE final outcome of the Spanish-American war is already the subject of a good deal of discussion in home papers. It is recognised. that Spain has lost Cuba, and if hostilities continue she will certainly lose Puerto Rico. As for the Philippines they are regarded, by all except the Spaniards, as hopelessly lost already. The Spaniards are, however, pany of the King's Own Regiment, one of of opinion that this Asiatic possession of the Spanish Crown should be retained at all costs. As the London Telegraph points out however:-" How are the islands to be re-"covered? It is true that the Americans "are not in possession, but it is at least "equally true that Spanish authority does "not extend beyond the suburbs of Manila, "if its limits are not even more cir-~ "comscribed. The re-establishment of her "rule would—even if America waived her than Russians are employed.—China Gazette. "claims—cost Spain as much as she has "already wasted on Cuba. Peace can be "obtained, with or without external inter-"vention, but it will be peace on terms "which are not likely to be modified by a "prolongation of the war." The Spanish Authorities in Manila are now, if all reports be correct, endeavouring to come to terms with the rebels and induce them to make opium.—Union. common cause against the invaders. But the Filippinos have had a lengthened experience of Spanish bad faith and will be chary of coming to any agreement with their ancient oppressors. It is true the natives 30th Jano. Thomas Rees, steward of the may cherish dreams of and aspirations for independence which the Americans will be unable at once to gratify. But it cannot be doubted for a moment that they would prefer to take the chance of a share in selfgovernment and a gradual enfranchisement under the protection of the stars and stripes rather than run the risk of the renewal of the bridge he threatened to put a knife into Spanish rule and of the reimposition of the priestly yoke they so bitterly dislike.

The intentions of the Washington Gov- catching him by the throat he was sentenced to three months' imprisonment with hard labour. ernment are not clearly known in this: They have not yet caught their hare, but when they have secured it we are of opinion they will not hastily or without much calm deliberation again abandon it. was given last night. There was a fairly large andience, but we shall be surprised if, as the The British Government once gave up Manila without receiving the stipulated ally known, the accommodation provided is not indemnity, but the Ministers of President faxed to the fullest extent, for popular as is the over the conflict between the United States and no increase of domend from that place can be price be not sufficient to pay the account taxes, the new Civil Code now promugator, to go summess authorized which the foreign the foreign that Singapore has only a, our unawers, so that Singapore has only a summer of the think, to emulate such an example. > THE AMERICANS AND THE PHILIPPINES.

INTERESTING REPORT BY CONSUI WILLIAMS.

A recent issue of the Washington Times has From information just come to light, it appears that the Administration has finally determined upon a state policy concerning the collided with a ricksha. The ricksha coolie Ying, chief commandant of the garrisons in Philippines. It is the evident intention of this Government to annex the islands and thus inaugurate a system of territorial expansion which shall broaden the interests of the nation to an extent not hitherto dreamed of and plant our flag upon the seas."

It develops now that this policy of the East has not been hurriedly formulated. It was considered and outlined even before Admiral Dewey seized the Philippines and will be made operative as soon as the annexation of Hawaii has been accomplished. Not until this has been done will the Administration proclaim its Philippine policy.

GATHERING DATA IN ADVANCE. Shortly previous to the declaration of war with Spain, and some considerable time before Admiral Dewey was ordered to take the Philippines. United States Consul O. F. Williams, was instructed by the State Department to collate all available information and statistics concern. ing the Spanish system of taxation in the islands, their peculiar sources of revenue, etc., and forward the results of his labours at the carliest possible opportunity. Assisted by Vice-Consul Daland, Consul Wil-

liams hurriodly compiled the desired data, and his report came into the possession of the State Department three weeks ago.

REVENUE OF THE PHILIPPINES. Since then a force of experts under the direction of the President has been busily engaged in reparing a new system of taxation for the Phippines which shall soon be made operative and thus establish the first crude form of American government in the islands. Consul Williams's report may be briefly sumparised as follows:-

For the year of 1897 exports from the Philip oines amounted in value to \$35,000,000, of which \$250,000 was derived from coffee, \$8,000,000 rom hemp, \$6,000,000 from sugar, \$2,000,000 from tobacco, and the balance from less important products, such as ebony, gutta percha, logwood, cane, recognate, fruits and minerals. The system of exerbitant taxation imposed by the Spanish Government, as shown in the report, approaches very near to brutality in

some of its dotails, and removes the last vestico of surprise at the widespread insurrection and rebellion prevalent among Spain's subjects. From the Philippines Spain has realized annual tax revenue of nearly \$20,000,000, males over twenty-one years of ago are required to pay a varying poll tax of from \$3 to \$25 per year and work fifteen days each year for the government in lieu of an additional exemption. tax of 87.50. WOMEN TAXED ALSO.

Women over twenty-one years of age are required to pay a poll tax of from \$2.50 to \$14. according to their station in life. A tax of from \$1 to \$5 is imposed upon the huts occupied. possession valued at more than \$2 is taxed. grave-diggers before a body may be buried. portant branch of Japanese trade. Singapore provided for Chinese and foreigners who en- conceded. Applying this rule to Japan's may be the duty of H.M.'s Government to take gage in business in the Philippines. These are t case, we arrive at the result that since with regard to that official." made so high that it is impossible for any but foreign ownership of shares is not textually

are annexed to the United States. For three weeks now this work has been rapidly pushed and is very nearly completed.

THE AMERICAN PLAN. In brief, the proposed plan of American toxation is to remove entirely the present exorbitant Spanish tax imposed upon household goods. beasts of burden and native products, and substitute therefor reasonable property and poll taxes very similar to those exacted in this coun-A jinricksha coolie being charged and try. No poll tax will be levied upon women. Import duties to the Philippines will be low

ered, almost cut in half. The native products of the Philippines, consisting of sugar, cane. coffee, tobacco, rice, hemp, cocca, vanilla, peppossession of 14 taels of dross opium was told | per, ginger, corn, wheat, fruit, ebony, logwood, resewood, cedar, gutta percha, gold, silver, quick-silver, copper, iron, coul, saltpetre, nickel, coral, turquoise, and amber, will be admitted to to the United States duty free with, perhaps, l'some regulations calculated to protect home industries until the new order of things adjusts itself from a commercial point of view. PHILIPPINE LABOUR.

It is also proposed to regulate the wage scale in the islands. Philippine labour is now rated nt from 5 to 20 cents per day. The Government will fix a minimum scale of 80 cents per day Thus will the tax revenues of the Philippines be cut to about \$3,000,000 a year, instead of \$20,000,000 as now fixed by Spain. It is believed by economical experts that this new order of things will give new zest to commercial affairs in the islands, and eventually put the tax revenues far above \$20,000,000 by reason of a greatly increased volume of business.

As an evidence of how near at hand is the annexation of the Philippines, it may be stated that the Administration is now considering the appointment of an official collector of customs, the shall be disputched to the islands to inbelieve that the selection of such an official has

SIAM AND FRANCE.

MEMBER OF THE FRENCH LEGATION.

PRINCE DEVAWONGSE REQUESTS THE

*FRENCH MINISTER TO EXPEL THE

THE FRENCH MINISTER REPUSES.

Bangkok, 1st July. The greatest excitement reigns in Siamese official circles here on account of the alleged conduct of M. Montmittonet, a member of the French Legation. Though the incident is in itself trifling, it has assumed enormous significance from the fact that Prince Devawongse, the Siamese Minister for Foreign Affairs, has made a point of it in his communications with the French Legation. On the other hand, the French Minister Plenipotentiary has treated these communications with disregard. The history of the affair is this :---

According to the Franco-Siamese convention of 1893, all Lactians in Siamése territory must be allowed, and even assisted, by the Siamese Government to cross to the left bank of the Mekong. The French claim these Luctians as subjects since in former years, they were con-The foreign community of Yokohama was quered by the Siamose and driven from treated their deputy in an intolerably overbear-Investigation as to the cause of the suicide ing manner on all occasions. OFFICIAL INTERVIEWING

DISAPPROYAL BY THE SECRETARY OF

The following circular letter from Mr. Chamberlain to the Governors of the colonies has been published :-My attention has been called to the practice which has recently become not uncommon, and of which I entirely disapprove, of Governors. and other officials in the Colonial service, or recently in that service, allowing themselves to be interviewed on leaving or arriving in England, and giving their opinions on debateable questions of public policy, or on matters affecting the defence and military resources of British possessions. I need scarcely point out the grave inconvenience which might result from the practice referred to; and I therefore consider it necossary that all officers employed under thisdepartment in the Colonial service should be warned, under pain of serious consequences, not to allow themselves to be interviewed on questions of the nature indicated. I desire that you will bring this circular despatch to the notice of allofficers serving in the colony under your government, and arrange that, on the occasion of

MID-FORMOSA RELIEF FUND.

be again drawn to the matter.

It will be remembered that in August 1896 an appeal was made, and liberally responded to, and 13,924 boxes ten (292549 lbs.). For for the relief of the sufferers by the troubles in the centre of Formosa. Owing to the disturbed state of the country it was simply impossible to i make any attempt to distribute the funds in the hands of the Treasurer until May last. The Rev. W. Campbell, head of the E. P. Mission in Formosa, has at last completed the Manchester:—126 bales waste silk, For Gibtask, and in spite of many difficulties and some raltar:-1 case curios. For France:-727 bales amount of danger, owing to the threatening raw silk, 100 bales waste silk, 4 cases silk piece attitude of the robbers still at large, has returned to Tainanfoo after a most successful tour. Mr. Campbell, it will be recollected, was entrusted with the subscriptions, raised in-Hongkong, for distribution among the natives of the Pescadore islands after the lamentable loss of the Bokhara. In his report to the Treasurer Mr. Campbell

"After two months absence, I have just returned from the Kagee country where I distributed among suffering poor the three thousand dollars with which you entrusted me. The distribution was made at six market towns in that part of the country formerly called Hun-lim; 584 persons in all receiving five dollars each and a few of these who were in greater want, through the loss of relatives and property two years ago, receiving grants of ten dollars each. I was greatly assisted in the difficult duty of finding out really deserving cases by the local officials at the various centres. Indeed, had it not been for this willingly rendered service, it would have been quite impossible during the time at my disposal to have had the distribution made in anything like a satisfactory way. The poor people expressed much gratitude on receiving their little allowances, while others had no difficulty in understanding that the whole proceedings amounted only to a disinterested act of kindues towards those whom the Japanese themselves had already been assisting in a

Mr. Campbell concludes his report with a cordial acknowledgment to the Treasurer for having called on one of the members of the E. P. Mission to take a share in the carrying out of the good work. The thanks of the subscribers are certainly due to him for the painstaking and businesslike way in which the distribution has been conducted. Acknowledgments are also due to Mr. Isogai, Prefect of Tainan, and the Japanese officials in the country; without whose assistance it is doubtful if Mr. Campell's journey could have been brought to such a satisfactory termination.

similar way."

SCIENTIFIC MISCELLANY

Among the advantages to be looked for in electric tornedo boats are the lack of flaming funnels and noisy machinery to give notice of approach, freedom of risk from cut steam pipes or wrecked boilers, diminished upper works to serve as a target, and ease and rapidity of manipulation by the commander with one hand on the controller. A writer in The Electrical World suggests the possible suitability of primary batteries. For a 140 foot boat, with a displacement of 110 tons, engines of 2,000 horse-power are necessary to give a speed of 25 knots," and a weight of 75 tons is all that could be allowed for batteries __a motors. Four motors of 500 horse-power each would weigh about 12 tons. This would permit the carrying of 200 cells consisting of 13 zino plates 18 thehes square and 12 plates of like size of copper oxide compressed on copper with an electrolyte solution of strong caustic alkali. Glass jars of 19 inches cube, with water-tight covers, would contain the elements. If such a battery would work satisfactorily, it should should drive the vessel at full speed for one hour, or about 100 miles at

Education of the protoplasm is Prof. Ray Lankester's explanation of the prevention or cure of severe disease by mild incentations. Mr. & Mrs. J. H. Cox son and 3 children Protoplasm can be taught to tolerate chemical action from which it naturally shrinks, and on growing to the edge of a solution of sulphate of iron would at first draw back, and then plunge in, thereafter having no fear of sulphate of iron. Certain corpuseles of the blood are attracted to disease gorms and swallow them. But the bacteria in turn produce a poison that repels the corpusoles, and it is by teaching the latter by gradually increasing doses that they are made capable of resisting the full poison of the disease.

The so-called singing shells are a marvel of TAVID CORSAR Estticales Lake in Ceylon, sid on a quiet evening the weird phenomenon produces an effect that is decidedly pleasing.

Modern relinement in scientific research is strikingly illustrated in the bolometer, or heat balance of Prof. S. P. Sangley, which is de- 2886] signed to measure extremely small amounts of radiant heat. Its action depends upon variations of electrical resistance produced in strips of platinum by changes of temperature the alterations thus caused in the strength of the current passing through the metal being registered upon a delicate galvanometer. The instrument, first described in 1881, has now been so improved that its sensitiveness is 400 times as great as at first. Changes of much less than one ten millionth of a centigrade degree / A/IITSUI BUSSAN KAISHA may be detected by it, the acouracy is practically WI absolute, and its precision of pointing is such No. 6, ICE HOUSE STREET, PRAYA CRETEAL. that it may be directed toward any line in the spectrum with a probable error of little more than a second of are on the first observation; During recent years the bolometer has been employed in Washington in mapping the lines in the invisible portion of the spectrum, the observations being made in a chamber whose

The "dark days" which formerly brough such constanation to the world are usually supposed to be due to smoke from extensive forest fires or to volcanie dust. The direful import of New England's dark day of 1780 is still a matter of local tradition, but an even more remarkable occurrence was recorded in 1783, when a bluish haze obscured the sun for many days throughout Europe and northern Africa and to some extent in Avia and North America. In July, 1896, a thick smoke covered
